I was thinking about the gear we looked for last December, without success.

Yes, I remember, but not sure what we'd do down there, except maybe look again for their lost gear.

I'm good on all those dates Eric. Remember all those wonderful boats in Narragansett.

Doos:

I've been trading messages with Tim about the boat's availability and there aren't many windows of opportunity from now through August. The boat is in the yard at present with work being done on the lower unit that isn't scheduled to be completed until July 15. Does the lab have any other vessels comparable to the Parker? Tim is available August 11 and 12, so I thought we might schedule one of those days for Phil's blue carbon work. Who is available then?

Also, either Aug 4 or 5 (or possibly both), I plan to do clam sampling in the Merrimack River. I'll probably just need one other diver besides Chuck for that.

I'd like to get into the water in July, even if it's only training/proficiency, but the month is already becoming cluttered up with other stuff. Please give me some dates in July that work for you to do a shore-based dive.

Thanks.

Eric
